

POLYNEON 40 green

Machine embroidery threads made from 100 % GRS certified recycled polyester

Eco-friendly – Brilliant – Premium

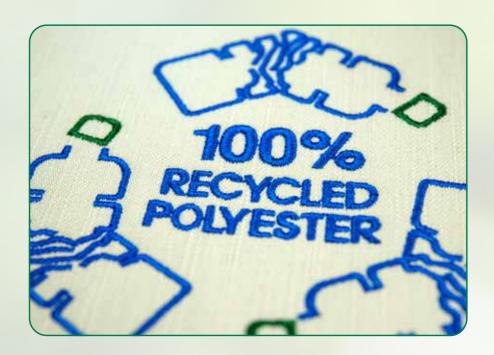

NEW

We reduce plastic bottle waste, the quality remains

Polyneon Green is a premium embroidery thread created in response to the global demand to reduce plastic bottles. This waste affects the balance of our environment; with Polyneon Green, we are reducing the amount of plastic in the environment and making the textile industry more sustainable.

Carefully produced, this new thread possesses the same high-quality standards as all other polyester threads from Madeira.

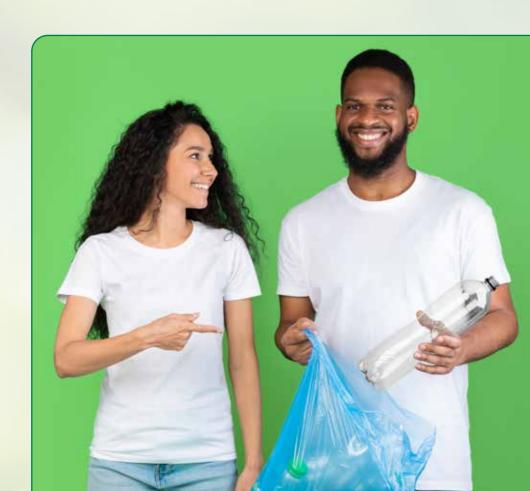

So you can **enjoy** creating premium, resistant, and shiny embroideries while reducing the impact on the environment.

Stitch those bottles!

It takes up to **450 years** for a PET bottle to break down but it **is never truly gone**. Yet the amount of such plastic that ends up in landfills and the oceans has increased dramatically over the last 50 years.

Recycling and reusing has grown vital. Everyone can play their part in the solution by reducing the plastic containers we use, recycling, and choosing recycled products manufactured from post-consumer waste.

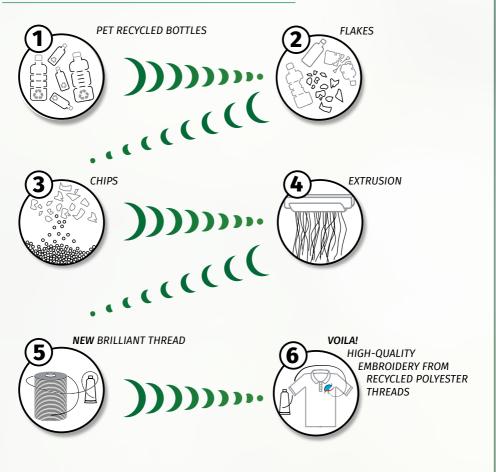

Try Polyneon Green and you will be amazed at just how far we have come in creating shiny new premium thread out of old PET bottles.

Recycling plain plastic into radiant embroideries

Our Polyneon Green thread is manufactured using recycled transparent bottles made of polyethylene terephthalate (PET). The process gives post-consumer waste a second life in brilliant, shiny colours. By reusing existing materials, no new waste is created, and non-renewable resources are saved.

How do we make it happen?

Stitch density: approx. 0.4 mm

*Indicative thread tension: 120 - 130 gf or cN

*Indicative bobbin thread tension: 25 gf or cN

*Always test and adjust to machine settings, fabric and design.

Recycled polyester in genuine Polyneon quality

- new high quality embroidery thread made of recycled plastic
- energy-saving production process
- excellent performance on industrial embroidery machines
- robust, stable, shiny, and resistant to chlorine
- colour consistency
- STANDARD 100 by OEKO-TEX®, Annex 6, product class I
- designed and engineered in Germany
